Connector : Ultimate UP01 \& UR50
General Instructions Size 08, 11, 13 \& 18

Cable Assembly Instructions

Pictures show the Ultimate UP01 Size 11.
Exceptions are indicated in this document.

Strip cable jacket to dimension $L$ below:

| Size | Pin Layout <br> (Number of <br> Contacts) | Termination | L [mm] |
| :---: | :---: | :---: | :---: |
|  | $2 / 3$ | Solder | $\mathbf{1 2}$ |
|  | $4 / 5 / 7 / 9$ |  |  |
|  | All | Crimp | $\mathbf{1 8}$ |
| 11 | All | Solder | $\mathbf{1 4}$ |
|  | All | Crimp | $\mathbf{1 8}$ |
| 13 | All | Crimp | $\mathbf{2 6}$ |
| 18 | All | Crimp | $\mathbf{2 8}$ |

## Connector: UP01 \& UR50

Pull back the Kevlar.
Secure the shield and the Kevlar with tape.

Trim back conductors acc. to table below:

| Size | Pin Layout <br> (Number of <br> Contacts) | Central <br> $[\mathrm{mm}]$ | Intermediate <br> $[\mathrm{mm}]$ |
| :---: | :---: | :---: | :---: |
| 08 | 7 | $\mathbf{1 . 5}$ |  |
|  | 9 | $\mathbf{1 . 5}$ |  |
| 11 | 12 | 2.5 |  |
|  | 16 | 3 | $\mathbf{1 . 5}$ |
|  | 19 | 3 | $\mathbf{1 . 5}$ |

Strip all conductors to 1.5 mm .
Solder all conductors to Contact Block.

0 Strip all conductors (L1) and crimp the contacts.
For stripping length L1, crimp tool, setting and positioner, please refer to online Crimping Instructions.

| Insert contacts into the insulator <br> with insertion tool. |  |  |  |
| :--- | :--- | :---: | :---: |
| Ensure that the contact is in position |  |  |  |
| by slighty pulling on the wire. |  |  |  |
| For insertion tool please refer to |  |  |  |
| online Crimping Instructions. |  |  |  |

Without lubricating the 0 -ring, slide it down on to the Contact Block.

Warning: DO NOT lubricate the O-ring because this will hinder proper adhesion of the potting material and prevent sealing.

Pull out the Kevlar from the tape.

## Connector: UP01 \& UR50

 General Instructions Size 08, 11, 13 \& 18Open the Spacer and place it on to the cable.

Hold the Spacer with the Contact Block and align the grooves of the Spacer and of the Body.

Insert the Contact Block with the Spacer into the Body.
Push the Spacer until it clips inside the Body. Ensure that the Spacer is fully engaged by pulling slightly on the cable.

Install the assembly into your potting fixture.
Heat up the epoxy:
Recommended epoxy type: RS 851-044 ${ }^{(1)}$

1) Or equivalent.

## Connector: UP01 \& UR50

Slowly dispense potting material into the connector.

The potting material should cover the Spacer but should not reach the level of the Washer support seat.

Allow the potting material to cure according to its specifications.

Fold the shield evenly over the Washer slightly on the cable.

## Connector: UP01 \& UR50

Pull down the Back Nut and tighten it by hand.

Tighten and secure the Back Nut with the following torques to have an optimal shield continuity. Use a receptacle as counterpart for this operation.

| Size | Torque <br> $[\mathbf{N m}]$ | Spanner <br> Sizes [mm] | DO NOT SCREW BEYOND <br> $[\mathbf{N m}]$ |
| :---: | :---: | :---: | :---: |
| 08 | 2.5 | 10 | 3 |
| 11 | 3.0 | 14 | 4 |
| 13 | 3.5 | 17 | 5 |
| 18 | 6.0 | 22 | 8 |

The use of a "Breaking" Torque Handle is recommended for all sizes.

Install the assembly back into your potting fixture.

Fill up the Back Nut with following recommended epoxy material:

- For straight plug: RS 851-044 ${ }^{(1)}$
- For angled plug: RT $125{ }^{(1)}$

Put a small amount of epoxy around the cable and let it cure.
